SCOTCH SINGLE MALT

To be called scotch whisky, the spirit must be distilled at a Scottish distillery from water and malted barley, to which only other whole grains may be added (grain whisky), have been processed at that distillery into a mash and fermented only by the addition of yeast, and distilled to an alcoholic strength of less than 94.8% by volume.

HIGHLANDS

Generalizations about the Highland region are less valid, as its whiskies will range from dry to sweet, and some even have a touch of smoke and peat.
